

# Member's Corner

Ron Hall Sprinklers is a family-owned business based in Great Falls, Montana. It all started with a science teacher with a shovel looking for summer work in 1972. What started as irrigation installation has expanded to mowing, trees and lawn care, irrigation system winterization, and snow removal. 75% of their work is comprised of residential, 25% commercial work. Their goal is to install residential sprinkler systems in one day, while providing super clean-up and a maintenance manual for every client.

When asked if they use any specialized equipment in their day-to-day work that they would recommend to fellow MNLA members, they recommended a pipe-puller, line locators, mechanical spreaders, and a boring machine.

Ron Hall Sprinklers is celebrating 50 years of business this year!
